

Keeping in touch with home

We know that when you are away from home it is important that you stay in touch with your family and friends back home. We have a computer with internet connection so you can email those close to you, and a pay phone has been installed at Larga for making personal calls.

If someone wants to contact you all they need to do is call (780) 477-6284. Larga Ltd. is located at 10723 - 111 Avenue in Edmonton.

Heading Home

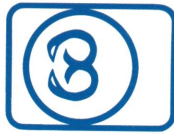

When it comes time for you to return home to your family and friends we'll be at your side to make your arrangements from booking your ticket to getting you to the airport on time to catch your flight. And once we've ensured your tickets and departure are in order, we'll bid you a safe and happy journey home!

LARGA LTD.

Welcome!

Welcome to Larga Homes - “your home away from home” when you are in Edmonton for medical care. At Larga we want you to feel our warm welcome from the minute you step off the plane in Edmonton and our driver meets you at the airport to the last minute before you head back home to your family and friends.

We know that being away from the support of your family and friends during what can often be a traumatic and stressful time is difficult but our terrific team at Larga is here to help you. We have taken every measure to ensure that your stay is as trouble-free and comfortable as we can make it.

When you are picked up at the airport our driver will have complete information on your destination and any special assistance you may require. Upon arrival in the city the driver will either take you to Larga or directly to the hospital for admission if that is the arrangement made for your care.

Serving You

Caring for you is what we do best. Our driver is available to shuttle you back and forth to your appointments or if you have come as an escort, we'll take you to visit the individual you've escorted to the city. Whatever your medical needs are, we are here to help.

We also have a strong working relationship with the Northern Health Services Network team, the team of nurses who work out of the Royal Alexandra Hospital to help coordinate health services for northerners. Together we ensure that your health needs are met, that you attend your appointments, and help ensure that your cultural and language needs are met.

Our Home

At Larga Homes in Edmonton we've created our own little piece of Canada's North right in downtown Edmonton. Not only does the décor inside our “home” reflect the arts of the North but we've also created an outdoor space that we hope you'll find welcoming and relaxing where you can enjoy an outdoor fire and our gazebo. You'll also be surrounded by people who understand the emotions and feelings you are experiencing and who are ready to lend a helping hand or provide a sympathetic ear to make things better for you.

Our two new buildings (the main building was opened in 2000 and the apartment-style unit opened in 2003) are conveniently located in downtown Edmonton close to both the Royal Alexandra Hospital and the Glenrose Rehabilitation Hospital. In addition we are located right across the street from the popular Kingsway Garden Mall for your shopping convenience during your spare time.

Our Team

Owned by the Gwich'in Tribal Council, Nunasi Corporation and Kitimeot Corporation, one of the best qualities at Larga is undoubtedly our terrific team. We are dedicated to meeting your needs and helping you get back home quickly to your family and friends. Our team is rich with experience and are either originally from the North or have spent considerable time living in Canada's North so we are familiar with the lifestyle, customs and traditions of the North. Trust that our staff know what you are feeling being away from the comfort of your own home and community and that we will always be ready with a sympathetic ear to help ease your stay.

We have a safe, warm and caring environment in our facility with a strong family atmosphere that encourages our guests to mingle with others, which also helps ease the burden of being away from home. The supportive environment created by our staff and other Northerners down for medical care is also an important step in making it easier to be away from home.
